PLUMBING WORLD INVERCARGILL 2017

Plumbing World was completed in 2017, and the architectural design of the building was very popular!

When Plumbing World Invercargill was completed in 2017, the collaboration between McCulloch Architects and Barry Stewart Builders was deemed so successful that Plumbing World started using this design to model other stores and showrooms after it. The 1,062 square metre premise caters for trade and the public through specific warehouse and showroom areas.

Design, build and develop - it's what we do.
